VISION VAULT SOLUTIONS · ADMIN GUIDE

Import clients and past returns from Excel

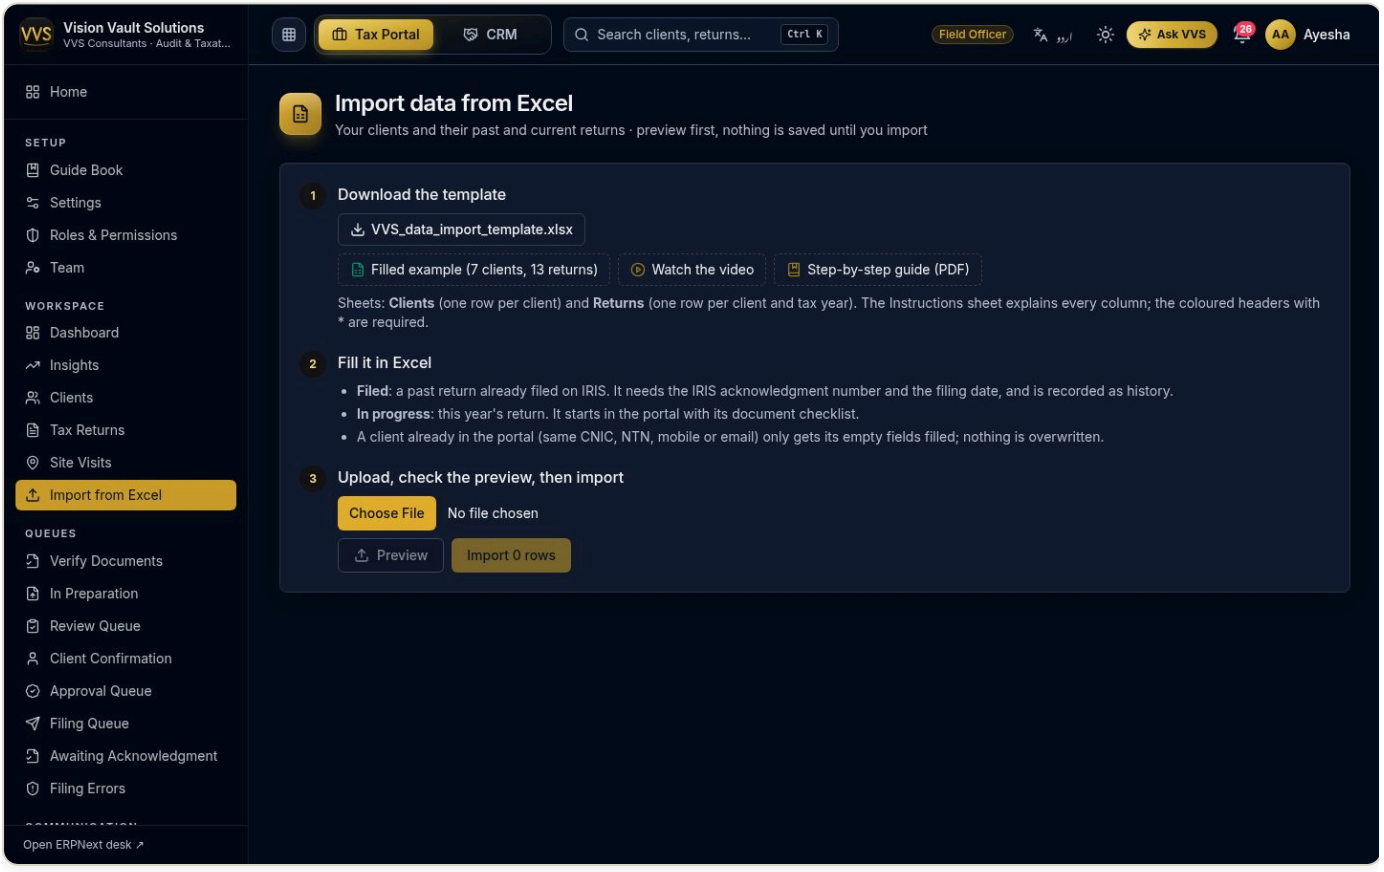

Bring the firm's existing clients and their tax-return history into the portal in one go: download the template, fill it in Excel, upload it, check the preview, then import.

1 · Download	2 · Clients	3 · Returns	4 · Preview	5 · Import
The .xlsx template	One row each	Filed / In progress	Nothing saved	Valid rows

Who: **Tax Admin** · **Tax Consultant** · a filled example is on the import page

1 Download the template

1. Open **Workspace** → **Import from Excel**.
2. Click **VVS_data_import_template.xlsx** to download the blank template.
3. **Filled example** downloads the same template with 7 sample clients and 13 returns: open it to see how a finished file looks.
4. The template has three sheets: **Instructions**, **Clients** and **Returns**. Keep the header rows as they are.

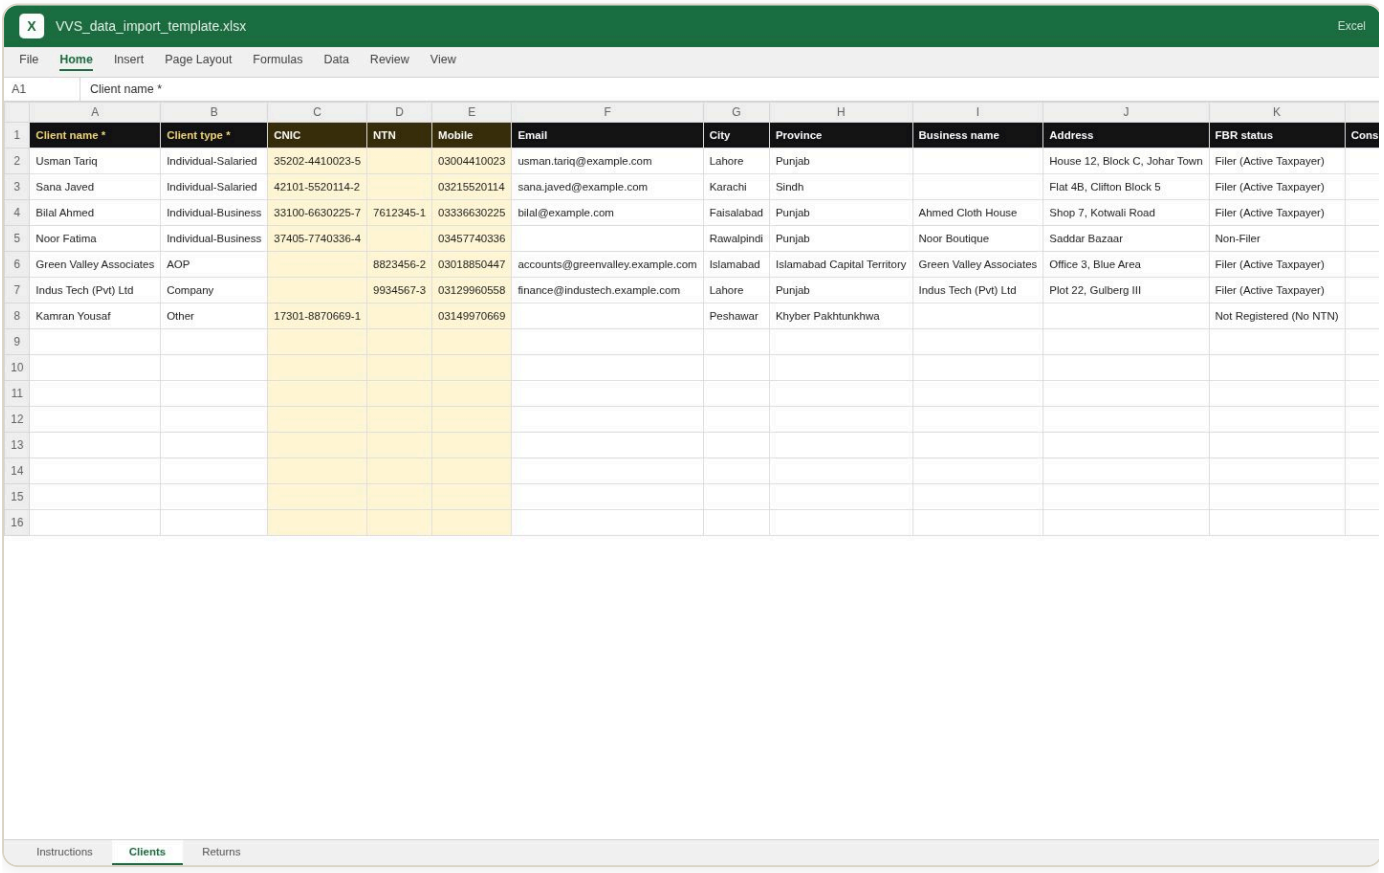

Import from Excel: download the template, fill it, upload it.

2 Fill the Clients sheet

Column	Write it like	Notes
Client name *	Usman Tariq	Person or business name
Client type *	Individual-Salaried	Individual-Salaried, Individual-Business, AOP, Company, Other
CNIC	35202-4410023-5	With or without dashes
NTN	7612345-1	For businesses, AOPs and companies
Mobile	03004410023	Also +92 300 4410023
Province · FBR status	Punjab · Filer (Active Taxpayer)	Pick from the list
Consultant email	consultant@…	Optional: assigns the client to a team member

1. One row per client. Only **Client name** and **Client type** (gold headers with *) are required; leave a cell empty when you don't know it.
2. Give each client at least one identifier: **CNIC** for individuals, **NTN** for an AOP or company, and the **mobile** number. The portal uses them to recognise a client and to link their returns.
3. Client type, province and FBR status have drop-down lists. Hover over a header in Excel to read its note.

	A	B	C	D	E	F	G	H	I	J	K	
1	Client name *	Client type *	CNIC	NTN	Mobile	Email	City	Province	Business name	Address	FBR status	Cons
2	Usman Tariq	Individual-Salaried	35202-4410023-5		03004410023	usman.tariq@example.com	Lahore	Punjab		House 12, Block C, Johar Town	Filer (Active Taxpayer)	
3	Sana Javed	Individual-Salaried	42101-5520114-2		03215520114	sana.javed@example.com	Karachi	Sindh		Flat 4B, Clifton Block 5	Filer (Active Taxpayer)	
4	Bilal Ahmed	Individual-Business	33100-6630225-7	7612345-1	03336630225	bilal@example.com	Faisalabad	Punjab	Ahmed Cloth House	Shop 7, Kotwali Road	Filer (Active Taxpayer)	
5	Noor Fatima	Individual-Business	37405-7740336-4		03457740336		Rawalpindi	Punjab	Noor Boutique	Saddar Bazaar	Non-Filer	
6	Green Valley Associates	AOP		8823456-2	03018850447	accounts@greenvalley.example.com	Islamabad	Islamabad Capital Territory	Green Valley Associates	Office 3, Blue Area	Filer (Active Taxpayer)

A filled Clients sheet: identifiers highlighted.

3 Fill the Returns sheet

1. One row per client **per tax year**. Tax year 2025 = 1 July 2024 to 30 June 2025.

2. Say which client the row is for with **one** of: client CNIC, NTN, mobile or client code (C-00456). It can be a client in the Clients sheet or one already in the portal.
3. **Filed** = a past return already filed on IRIS. Write the **IRIS acknowledgment number** and **filing date** (dd-mm-yyyy); without them the row is refused, because the portal never shows a return as filed without IRIS proof.
4. **In progress** = this year's return the team is working on. It starts in the portal with its document checklist; leave the figures empty.
5. Income and tax figures are optional, in rupees, numbers only (no Rs, no commas needed).

	A	B	C	D	E	F	G	H	I	J	K	L	M	N
1	Client CNIC	Client NTN	Client mobile	Client code	Tax year *	Status *	IRIS acknowledgment no	Filing date	Total income	Taxable income	Tax liability	Tax withheld	Tax payable	Refund due

A filled Returns sheet: past years Filed with IRIS proof, this year In progress.

4 Upload and preview

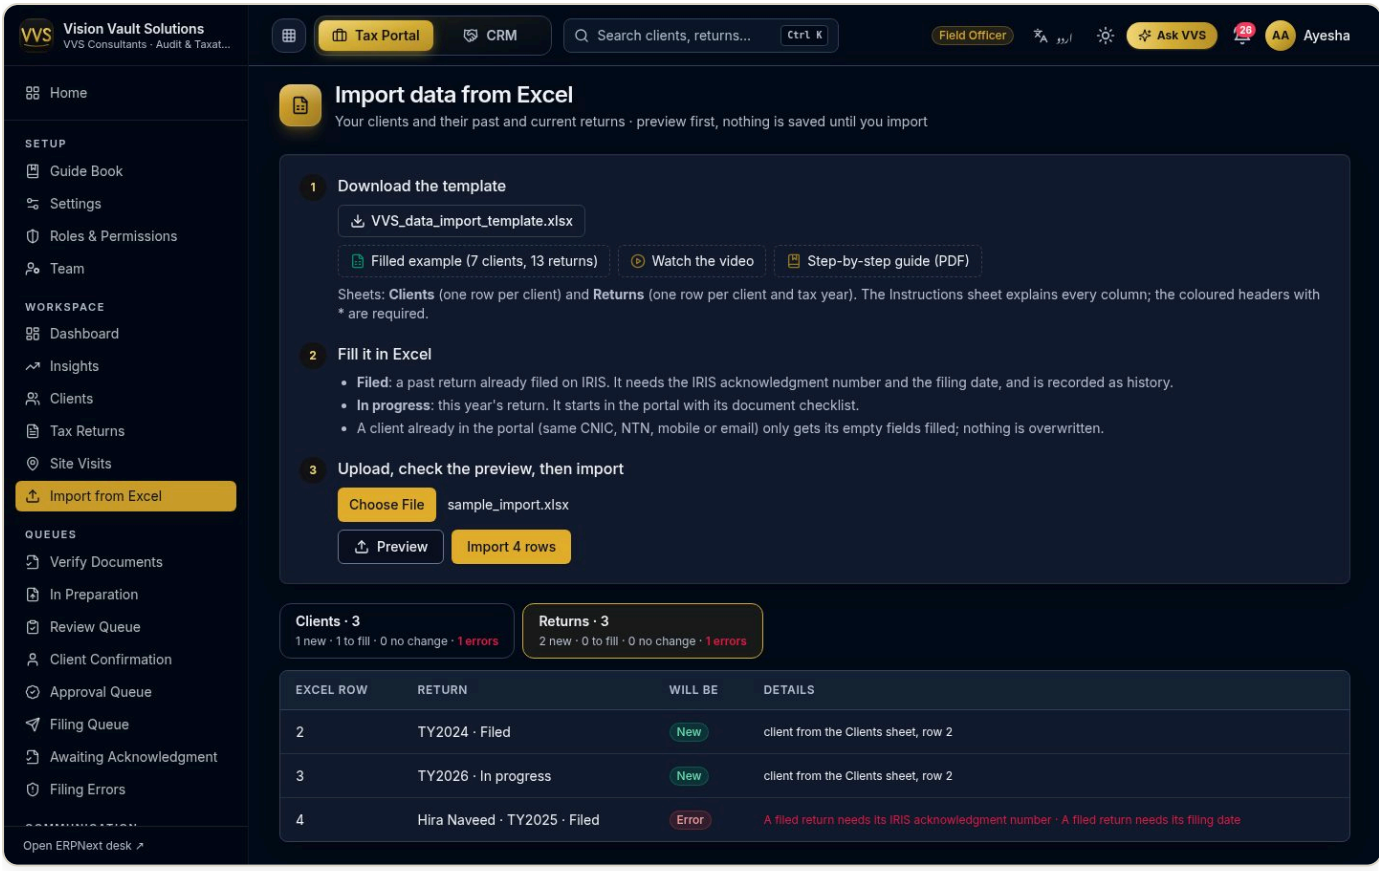

1. Back on **Import from Excel**, choose the filled file and press **Preview**. Nothing is saved yet.
2. Every row shows what will happen: *New*, *Fill empty fields*, *No change* or *Error*, with the reason. Switch between the **Clients** and **Returns** tabs.
3. A client already in the portal (same CNIC, NTN, mobile or email) only gets its empty fields filled. A value that differs is reported and kept as it is.

Preview of the filled example: 7 new clients, 13 new returns.

5 Fix the rows in error

1. Rows in error are shown in red with the Excel row number and the reason, for example a missing client type, a Filed return without its IRIS number, or a client that can't be found.
2. Correct those rows in the same Excel file, save it, and preview again.
3. You can also import the valid rows now and fix the rest later: re-importing the same file is safe, rows already in show *No change*.

A file with mistakes: each error says what to fix.

6 Import and check

1. Press **Import N rows**. Each valid row is saved on its own; up to 5,000 rows per file.
2. Open **Clients**: every imported client has a permanent client code (C-00…) and their returns. Filed years show the IRIS acknowledgment as history; this year's return is in the queue with its document checklist.
3. Next: invite the clients to the portal from their client page so they can upload this year's documents.

Screens in this guide are from the VVS tax portal with demo data (November 2026). Tax figures shown are estimates from demo slab rates.
