1 The verify queue

1. **Verify Documents** lists uploads waiting for a check.
2. **Verify**, or **Reject** with a reason the client reads.
3. When the last required document is verified, the return moves to *Draft* by itself.

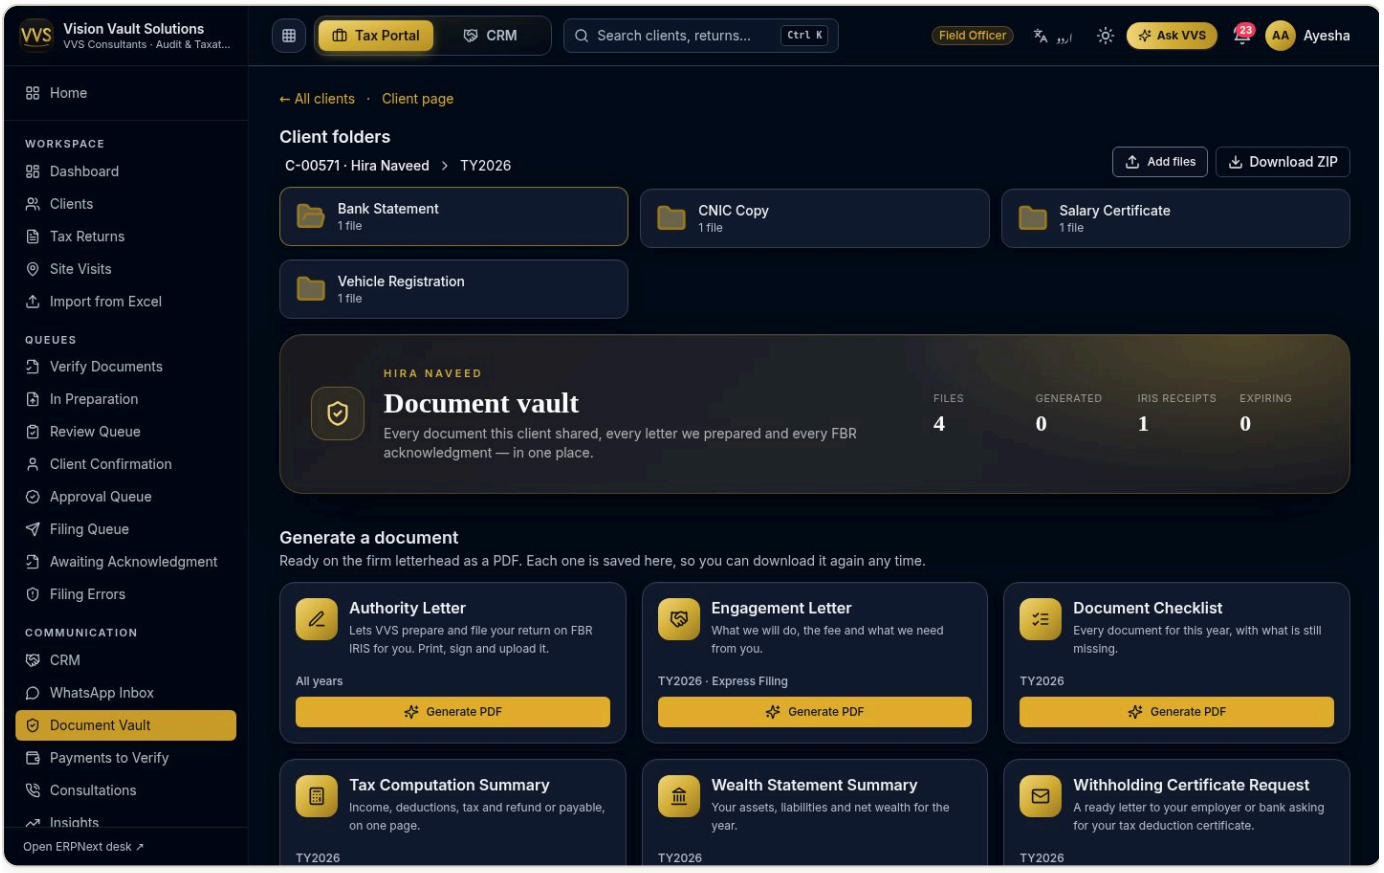

Documents waiting for verification.

2 Client folders

1. **Document Vault** → choose the client. **Client folders** shows `C-00456 · Name / TY2026 / type`.
2. Preview PDFs and photos, see older versions, and **Download ZIP** of a folder.

3. **Add files** uploads several at once; each one waits for verification.

A client's folders: one per tax year.
