How a return moves through VVS

Every income tax return follows the same steps, and every step belongs to one role. The portal sends each return to the right queue and keeps a record of who did what.

1 · Register
Client, code, invite

2 · Documents
Upload, verify

3 · Prepare
Income, calculate

4 · Review & confirm
Checklist, client OK, approve

5 · File
IRIS, acknowledgment

Who: **Consultant** · **Data entry** · **Reviewer** · **Approver** · **Filing officer** · the **client** in the portal

1 The steps and who does them

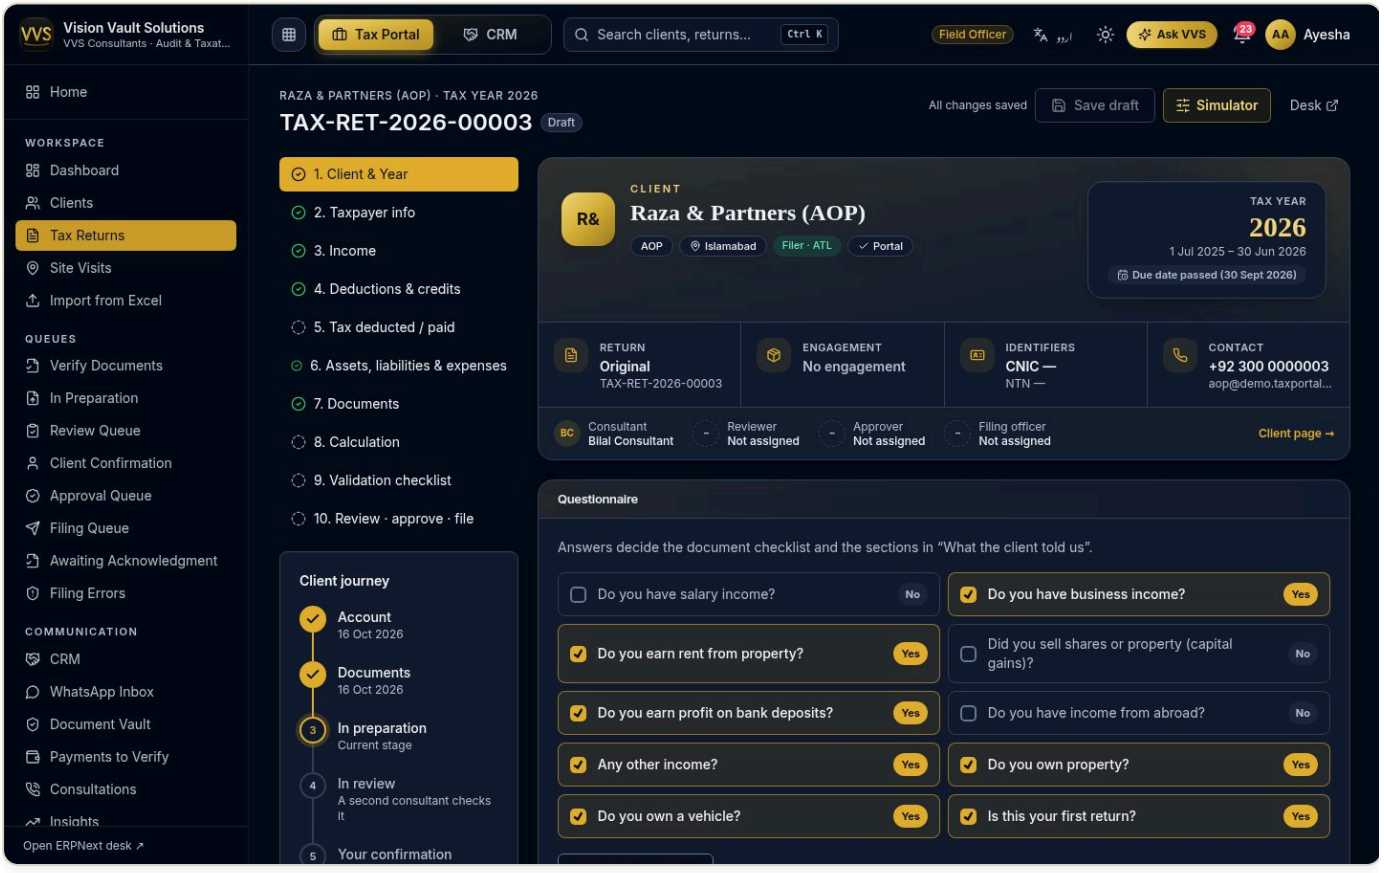

Step	Who	What happens
Documents Pending	Consultant	The checklist is collected; the return moves on when the last required document is verified.
Draft	Consultant, data entry	Income, deductions and withholding entered; tax calculated.
Pending / Under Review	Reviewer	Review checklist; changes or reviewed.
Awaiting Client Confirmation	Client	The client confirms the figures in the portal (or staff record it on their behalf).
Approved	Approver	Never the person who prepared it. The figures are fingerprinted.
Submitted to FBR → Acknowledged	Filing officer	Filed on IRIS; acknowledgment number and receipt recorded.

2 Where you see your work

1. The **Dashboard** counts your clients, returns, documents to verify, overdue returns and follow-ups.
2. Each step has a **queue** in the left menu; open a return from there.
3. A return's page shows its step chain at the top and its history.

Dashboard: your clients, returns and queues.

A return: the steps of the wizard, and the actions allowed now.

3 Rules that protect everyone

1. A figure changed after review or approval sends the return back to review and cancels the approval.
2. The preparer can never approve the same return.
3. A return is shown as filed only with an IRIS acknowledgment number.
4. Downloads and status changes are written to the audit log.

Screens in this guide are from the VVS tax portal with demo data (November 2026). Tax figures shown are estimates from demo slab rates.
